

Albid Nawar

Senior Product Analyst

Dhaka, Bangladesh

albidnawar@gmail.com | +880-1873-090851 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Senior Product Analyst with a background in Computer Science and hands-on expertise in end-to-end product strategy, UI/UX prototyping, and data-driven decision-making. Skilled in translating complex business goals into clear technical requirements (SRS), conducting client requirement sessions, and defining KPI frameworks for large-scale operations. Proficient in Figma, data analytics, and modern web stack concepts, with a track record of delivering high-impact retail analytics platforms for enterprise clients like Unilever and leading award-winning product teams.

TECHNICAL SKILLS

- **Product Strategy & Documentation:** End-to-end product lifecycle, SRS creation, requirement scoping, and client requirement analysis sessions.
- **Data & Analytics:** Synthesis of large operational datasets (800K+ data points), field force KPI modeling, POSM tracking, and PJP optimization.
- **UI/UX & Product Design:** User research frameworks, wireframing, high-fidelity prototyping, and component-based UI design using Figma.
- **Technical Communication:** Bridging business requirements with engineering execution using full-stack web and AI/ML technical background.
- **Tools & Technologies:** Figma, React, Python, SQL, REST APIs, Git, JavaScript, TypeScript, Excel, Power BI

EXPERIENCE

Senior Product Analyst — The Data Island

Jan 2026 – Present

- Conducted requirement gathering sessions and authored comprehensive Software Requirement Specifications (SRS) to define the end-to-end product scope for Unilever's ULens mobile app and web management portal.
- Monitored project milestones and tracked deliverable progress using agile frameworks, serving as the primary liaison for client communications and cross-functional coordination.
- Analyzed 800,000+ operational data points to identify performance bottlenecks, execution gaps, and key market trends, translating insights into actionable feature updates.
- Managed day-to-day retail execution operations and coordinated client onboarding, overseeing POSM allocation and real-time inventory tracking for field personnel.

Business Analyst — The Data Island

June 2025 – Dec 2025

- Conducted client requirement gathering sessions and translated complex business needs into detailed Software Requirement Specifications (SRS), functional specs, and project documentation.
- Analyzed client operational datasets to identify performance trends, gaps, and process inefficiencies, delivering data-driven insights and solution recommendations to key stakeholders.
- Collaborated with cross-functional development and sales teams on pre-sales and post-sales activities, including solution scoping, proposal drafting, technical demonstrations, and client onboarding.

Student Worker — North South University Public Relations Office

June 2025 – Dec 2025

- Maintained organized documentation and records for administrative processes and inter-departmental operations. Analyzed client operational datasets to identify performance trends, gaps, and process inefficiencies, delivering data-driven insights and solution recommendations to key stakeholders.
- Coordinated end-to-end media production operations for university events, managing official photography, videography, and promotional content creation while maintaining organized administrative documentation across departments.

RELEVANT PROJECT EXPERIENCE

ULens – AI Retail Execution Platform (Unilever Bangladesh)

- Served as Product Manager on a nationwide AI-powered retail analytics platform for Unilever's merchandising operations across Bangladesh.
- Designed data refinement and verification protocols to improve Vision AI accuracy in field retail environments, closely aligned with POSM visibility monitoring.
- Processed and validated 613,000+ operational data points at platform launch.

AinGPT – NSU Innovation Challenge (Champion)

- Led the championship-winning team for AinGPT at the NSU Innovation Challenge, directing end-to-end product development by designing the database schema and building both the frontend interface and backend APIs.

ACHIEVEMENTS & LEADERSHIP

- Champion & Team Lead — NSU Innovation Challenge (Project: AinGPT)
- Finalist — Blockchain Olympiad 2024, FinTech Track: AI-integrated Centralized Bank Client Information System
- Sub-Executive — Team Media & Promotions, NSU Computer and Engineering Club
- In-Charge — Team Media & Promotions, NSU ACM Student Chapter

EDUCATION

B.Sc. in Computer Science & Engineering

North South University

Jan 2022 – Jan 2026

CGPA: 3.52/4.00

Higher Secondary Certificate (Science)

Govt. City College, Chittagong

2018 – 2020

GPA: 5.00/5.00
